CONSOLIDATED FINANCIAL STATEMENTS AND REVIEW REPORT OF INDEPENDENT ACCOUNTANTS

JUNE 30, 2018 AND 2017

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

REVIEW REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of ScinoPharm Taiwan, Ltd.

Introduction

We have reviewed the accompanying consolidated balance sheets of ScinoPharm Taiwan, Ltd. and subsidiaries (the "Group") as at June 30, 2018 and 2017, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the three-month and six-month periods then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and International Accounting Standard 34, "Interim Financial Reporting" as endorsed by the Financial Supervisory Commission. Our responsibility is to express a conclusion on these consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the following paragraph, we conducted our reviews in accordance with the Statement of Auditing Standards No. 65 "Review of Financial Information Performed by the Independent Auditor of the Entity" in the Republic of China. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As explained in Note 4(3), the financial statements of certain insignificant consolidated subsidiaries were not reviewed by independent accountants. Those statements reflect total assets of $1,031,435 thousand and $2,579,912 thousand, constituting 8% and 20% of the consolidated total assets, and total liabilities of $28,513 thousand and $74,078 thousand, constituting 1% and 3% of the consolidated total liabilities as at June 30, 2018 and 2017, respectively, and total comprehensive loss of ($107,623) thousand, ($54,515) thousand, ($191,793) thousand and ($151,467) thousand, constituting (57%), (56%), (56%) and (67%) of the consolidated total comprehensive income for the three-month and six-month periods then ended, respectively.

Qualified Conclusion

Except for the adjustments to the consolidated financial statements, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries been reviewed by independent accountants, that we might have become aware of had it not been for the situation described above, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as at June 30, 2018 and 2017, and of its consolidated financial performance and its consolidated cash flows for the three-month and six-month periods then ended in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and International Accounting Standard 34, "Interim Financial Reporting" as endorsed by the Financial Supervisory Commission.

1. HISTORY AND ORGANISATION

(1) ScinoPharm Taiwan, Ltd. (the Company) was incorporated as a company limited by shares under the provisions of the Company Act of the Republic of China (R.O.C.) on November 11, 1997. The Company and its subsidiaries (collectively referred herein as the "Group") are primarily engaged in the manufacture of western medicines and other chemical materials, biological technology services, intellectual property rights, international trade and research, development and manufacture of Active Pharmaceutical Ingredients ("API"), albumin medicines, oligonucleotide medicines, peptide medicines, injections and new small molecule drugs, as well as the provision of related consulting and technical services.

(2) The common shares of the Company have been listed on the Taiwan Stock Exchange since September 2011.

(3) Uni-President Enterprises Corp., the Company's ultimate parent company, holds 37.94% equity interest in the Company.

2. THE DATE OF AUTHORISATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION

These consolidated financial statements were reported to the Board of Directors on August 1, 2018.

3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ("IFRS") as endorsed by the Financial Supervisory Commission ("FSC")

New standards, interpretations and amendments endorsed by the FSC effective from 2018 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board("IASB")
Amendments to IFRS 2, 'Classification and measurement of share -based payment transactions'	January 1, 2018
Amendments to IFRS 4, 'Applying IFRS 9, Financial instruments with IFRS 4, Insurance contracts'	January 1, 2018
IFRS 9, 'Financial instruments'	January 1, 2018
IFRS 15, 'Revenue from contracts with customers'	January 1, 2018
Amendments to IFRS 15, 'Clarifications to IFRS 15, Revenue from contracts with customers'	January 1, 2018

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IAS 7, 'Disclosure initiative'	January 1, 2017
Amendments to IAS 12, 'Recognition of deferred tax assets for unrealised losses'	January 1, 2017
Amendments to IAS 40, 'Transfers of investment property'	January 1, 2018
IFRIC 22, 'Foreign currency transactions and advance consideration'	January 1, 2018
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 1, 'First-time adoption of International Financial Reporting Standards'	January 1, 2018
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 12, 'Disclosure of interests in other entities'	January 1, 2017
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IAS 28, 'Investments in associates and joint ventures'	January 1, 2018

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

IFRS 9, 'Financial instruments'

A.Classification of debt instruments is driven by the entity's business model and the contractual cash flow characteristics of the financial assets, which would be classified as financial asset at fair value through profit or loss, financial asset measured at fair value through other comprehensive income or financial asset at amortised cost. Equity instruments would be classified as financial asset at fair value through profit or loss, unless an entity makes an irrevocable election at inception to present subsequent changes in the fair value of an investment in an equity instrument that is not held for trading in other comprehensive income.

B.The impairment losses of debt instruments are assessed using an 'expected credit loss' approach. An entity assesses at each balance sheet date whether there has been a significant increase in credit risk on that instrument since initial recognition to recognise 12-month expected credit losses or lifetime expected credit losses (interest revenue would be calculated on the gross carrying amount of the asset before impairment losses occurred); or if the instrument has objective evidence of impairment, interest revenue after the impairment would be calculated on the book value of net carrying amount (i.e. net of credit allowance). The Group shall always measure the loss allowance at an amount equal to lifetime expected credit losses for trade receivables that do not contain a significant financing component.

C. The Group has elected not to restate prior period financial statements using the modified retrospective approach under IFRS 9. For details of the significant effect as at January 1, 2018, please refer to Note 12(4)B.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2019 are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IFRS 9, 'Prepayment features with negative compensation'	January 1, 2019
IFRS 16, 'Leases'	January 1, 2019
Amendments to IAS 19, 'Plan amendment, curtailment or settlement'	January 1, 2019
Amendments to IAS 28, 'Long-term interests in associates and joint ventures'	January 1, 2019
IFRIC 23, 'Uncertainty over income tax treatments'	January 1, 2019
Annual improvements to IFRSs 2015-2017 cycle	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment. The quantitative impact will be disclosed when the assessment is complete.

IFRS 16, 'Leases'

IFRS 16, 'Leases', replaces IAS 17, 'Leases' and related interpretations and SICs. The standard requires lessees to recognise a 'right-of-use asset' and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.

In the first quarter of 2018, the Group reported to the Board of Directors that IFRS 16 has no material impact to the Group.

The Group expects to recognise the lease contract of lessees in line with IFRS 16. However, the Group adopts the modified retrospective approach, and the effects will be adjusted on January 1, 2019.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by IASB
Amendments to IFRS 10 and IAS 28, 'Sale or contribution of assets between an investor and its associate or joint venture'	To be determined by IASB
IFRS 17, 'Insurance contracts'	January 1, 2021

The above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers", and IAS 34, 'Interim Financial Reporting' as endorsed by the FSC.

(2) Basis of preparation

A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

(a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

(b) Financial assets at fair value through other comprehensive income.

(c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs") requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

C. In adopting IFRS 9 and IFRS 15 effective January 1, 2018, the Group has elected to apply modified retrospective approach whereby the cumulative impact of the adoption was recognised as other equity as of January 1, 2018 and the financial statements for the second quarter of 2017 were not restated. The financial statements for the second quarter of 2017 were prepared in compliance with International Accounting Standard 39 ('IAS 39'), International Accounting Standard 11 ('IAS 11'), International Accounting Standard 18 ('IAS 18') and related financial reporting interpretations. Please refer to Notes 12(4) and (5) for details of significant accounting policies and details of significant accounts.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

(a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.

(b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.

(c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

(d) Changes in a parent’s ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.

(e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

B. Subsidiaries included in the consolidated financial statements:

Note: The financial statements of the entity as of and for the six-month periods ended June 30, 2018 and 2017 were not reviewed by independent accountants as the entity did not meet the definition of significant subsidiary.

The financial statements of certain non-significant subsidiaries were consolidated based on their unreviewed financial statements as of and for the six-month periods ended June 30, 2018 and 2017. Total assets of these subsidiaries amounted to $1,031,435 and $2,579,912, representing 8% and 20% of the related consolidated totals, and total liabilities amounted to $28,513 and $74,078, representing 1% and 3% of the related consolidated totals, as of June 30, 2018 and 2017, respectively. Total comprehensive loss of these subsidiaries amounted to ($107,623), ($54,515), ($191,793) and ($151,467), constituting (57%), (56%), (56%) and (67%) of the related consolidated totals for the three-month and six-month periods ended June 30, 2018 and 2017, respectively.

C. Subsidiaries not included in the consolidated financial statements: None.

D. Adjustments for subsidiaries with different balance sheet dates: None.

E. Significant restrictions: None.

F. Subsidiaries that have non-controlling interests that are material to the Group: None.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in NTD, which is the Company's functional and the Group's presentation currency.

A. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.

(b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.

(c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

(d) All other foreign exchange gains and losses are presented in the statement of comprehensive income within "other gains and losses".

B. Translation of foreign operations

(a) The operating results and financial position of all the group entities, associates and joint arrangements that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;

ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and

iii. All resulting exchange differences are recognised in other comprehensive income.

(b) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, if the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:

(a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;

(b) Assets held mainly for trading purposes;

(c) Assets that are expected to be realised within twelve months from the balance sheet date;

(d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to pay off liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

(a) Liabilities that are expected to be paid off within the normal operating cycle;

(b) Liabilities arising mainly from trading activities;

(c) Liabilities that are to be paid off within twelve months from the balance sheet date;

(d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

A. Cash equivalents refer to short-term highly liquid investments that are readily convertible to known amount of cash and subject to an insignificant risk of changes in value.

B. Time deposits and bills under repurchase agreements that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

Effective 2018

A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.

B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.

D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

Effective 2018

A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income.

B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value. The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(9) Financial assets at amortised cost

Effective 2018

A. Financial assets at amortised cost are those that meet all of the following criteria:

(a) The objective of the Group's business model is achieved by collecting contractual cash flows.

(b) The assets' contractual cash flows represent solely payments of principal and interest.

B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.

D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(10) Accounts and notes receivable

A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.

B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(11) Impairment of financial assets

For financial assets at amortised cost, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(12) Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to cash flows from the financial asset expire.

(13) Inventories

The standard cost method is applied, and cost is determined using the weighted-average cost method. The cost of finished goods and work in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses. When the cost of inventories exceeds the realisable value, the amount of any write-down of inventories is recognised as cost of sales during the period and the amount of any reversal of inventory write-down is recognised as a reduction in the cost sales during the period.

(14) Property, plant and equipment

A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.

B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

C. Except for land, other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each component of property, plant and equipment is significant, it is depreciated separately.

D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Assets	Estimated useful lives
Buildings and structures	2 ～ 35 years
Machinery and equipment	2 ～ 12 years
Transportation equipment	2 ～ 6 years
Office equipment	2 ～ 9 years
Other equipment	2 ～ 19 years

(15) Intangible assets

Professional skills and computer software, etc. are stated at cost and amortised on a straight-line basis over their estimated useful lives of 3 ~ 5 years.

(16) Operating leases (lessee)

Payments made under an operating lease (net of any incentives received from the lessor) are recognised in profit or loss on a straight-line basis over the lease term.

(17) Impairment of non-financial assets

The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. When the circumstances or reasons for recognising impairment loss for an asset in prior years no longer exist or diminish, the impairment loss shall be reversed to the extent of the loss previously recognised in profit or loss. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

(18) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(19) Financial liabilities at fair value through profit or loss

A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges or financial liabilities at fair value through profit or loss. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:

(a) Hybrid (combined) contracts; or

(b) They eliminate or significantly reduce a measurement or recognition inconsistency; or

(c) They are managed and their performance is evaluated on a fair value basis,in accordance with a documented risk management policy.

B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.

(20) Notes and accounts payable

A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.

B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(21) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged, cancelled or expires.

(22) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

(23) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expenses in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expenses when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest of government bonds (at the balance sheet date) of a currency and term consistent with the currency and term of the employment benefit obligations.

ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise, and recorded as retained earnings.

iii. Pension cost for the interim period is calculated on a year-to-date basis by using the pension cost rate derived from the actuarial valuation at the end of the prior financial year, adjusted for significant market fluctuations since that time and for significant curtailments, settlements, or other significant one-off events. Also, the related information is disclosed accordingly.

C. Employees' compensation and directors' remuneration

Employees' compensation and directors' remuneration are recognised as expenses and liabilities, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employees' compensation is distributed by shares, the Group calculates the number of shares based on the closing market price at the previous day of the board meeting resolution.

(24) <u>Employee share-based payment</u>

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.

(25) <u>Income tax</u>

A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.

B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Group operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.

E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

F. Deferred tax asset shall be recognized for the carry forward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures, and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

G. The interim period income tax expense is recognised based on the estimated average annual effective income tax rate expected for the full financial year applied to the pretax income of the interim period, and the related information is disclosed accordingly.

H. If a change in tax rate is enacted or substantively enacted in an interim period, the Group recognizes the effect of the change immediately in the interim period in which the change occurs. The effect of the change on items recognised outside profit or loss is recognised in other comprehensive income or equity while the effect of the change on items recognized in profit or loss is recognized in profit or loss.

(26) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(27) Dividends

Dividends are recorded in the Company’s financial statements in the period in which they are resolved by the Company’s shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(28) Revenue recognition

A. Sales of goods

(a) The Group manufactures and sells API, intermediates, etc. Sales are recognised when control of the products has transferred, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customer, and either the customer has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.

(b) Revenue is recognised based on the price specified in the contract, net of the sales returns and discounts. Accumulated experience is used to estimate and provide for the sales returns and discounts, using the expected value method, and revenue is only recognised to the extent that it is highly probable that a significant reversal will not occur. The estimation is subject to an assessment at each reporting date. As the time interval between the transfer of committed goods or service and the payment of customer does not exceed one year, the Group does not adjust the transaction price to reflect the time value of money.

(c) A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Sales of services

(a) The Group provides technology development and consultation services. Revenue from providing services is recognised in the accounting period in which the services are rendered. For fixed-price contracts, revenue is recognised based on the service rendered up to the end of the reporting period as a proportion of the total services to be provided. The customer pays at the time specified in the payment schedule. If the services rendered exceed the payment, a contract asset is recognised. If the payments exceed the services rendered, a contract liability is recognised.

(b) The Group's estimate about revenue, costs and progress towards complete satisfaction of a performance obligation is subject to a revision whenever there is a change in circumstances. Any increase or decrease in revenue or costs due to an estimate revision is reflected in profit or loss during the period when the management become aware of the changes in circumstances.

C. Incremental costs of obtaining a contract

Given that the contractual period lasts less than one year, the Group recognises the incremental costs (mainly comprised of sales commissions) of obtaining a contract as an expense when incurred although the Group expects to recover those costs.

(29) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The Chief Operating Decision-Maker is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGEMENTS, ESTIMATES AND KEY SOURCES OF ASSUMPTION UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, and the related information is addressed below:

Critical accounting estimates and assumptions

(1) Evaluation of inventories

A. As inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date using judgements and estimates. As the manufacturing process is relatively complicated and time consumming, materials require longer lead time, the waiting period for product registration is long, and the timing of product launch may be deferred, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Since the calculation of net realisable value involves subjective judgement and the ending balance of inventory is material to the financial statements. Therefore, there might be material changes to the evaluation.

B. As of June 30, 2018, the carrying amount of inventories was $1,516,556.

(2) Realisability of deferred income tax assets

A.Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences can be utilized. Assessment of the realisability of deferred income tax assets involves critical accounting judgments and estimates of the management, including the assumptions of expected future sales revenue growth rate and profit rate, tax exempt duration, available tax credits, tax planning, etc. Any variations in global economic environment, industrial environment, and laws and regulations might cause material adjustments to deferred income tax assets.

B. As of June 30, 2018, the Group recognised deferred income tax assets amounting to $604,722.

(13) PENSIONS

A. The Company has set up a defined benefit pension plan in accordance with the Labor Standards Law, which applies to all regular employees' service years prior to the enforcement of the Labor Pension Act (the "Act") on July 1, 2005 and service years thereafter of employees who chose to continue to be covered under the pension scheme of the Labor Standards Law after the enforcement of the Act. In accordance with the Company's retirement plan, an employee may retire when the employee either (i) attains the age of 55 with 15 years of service, (ii) has more than 25 years of service, (iii) has reached the age of 65, or (iv) is incapacitated to work (compulsory retirement). The employees earn two units for each year of service for the first 15 years, and one unit for each additional year thereafter up to a maximum of 45 units. Any fraction of a year equal to or more than six months shall be counted as one year of service, and any fraction of a year less than six months shall be counted as half a year. According to the provisions, employees who retired due to their duties shall get additional 20%. Pension payments are based on the number of units earned and the average salary of the last one months prior to retirement. Calculation of average salary is in accordance with the Labor Standards Law of the R.O.C. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is not enough to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contribution for the deficit by end of March next year.

(a) The pension costs under the aforementioned defined benefit pension plan of the Company for the three-month and six-month periods ended June 30, 2018 and 2017 were $564, $659, $1,128 and $1,318, respectively.

(b) As of June 30, 2018, the Company's expected contributions to the pension plan for the next annual reporting period amounted to $2,938.

B. As a result of the enforcement of the Act, the Company set up a defined contribution pension plan which took effect on July 1, 2005. The local employees are eligible for the defined contribution plan. For employees who choose to be covered under the pension scheme of the Act, the Company contributes monthly an amount of not less than 6% of the employees' monthly salaries and wages to the employees' individual pension accounts at the Bureau of Labor Insurance. Pensions are paid by monthly installments or in lump sum based on the accumulated balances of the employees' individual pension accounts. The subsidiaries in Mainland China (SciAnda (Kunshan) Biochemical Technology, Ltd., SciAnda (Changshu) Pharmaceuticals, Ltd., and SciAnda (Shanghai) Biochemical Technology, Ltd.) are subject to a government sponsored defined contribution plan. In accordance with the related Laws of the People's Republic of China, the subsidiaries in Mainland China contribute monthly 18% of the employees' monthly salaries and wages to an independent fund administered by the government. Other than the monthly contributions, these subsidiaries do not have further obligations. The other subsidiaries, SPT International, Ltd. and ScinoPharm Singapore Pte Ltd., had no employees. For the three-month and six-month periods ended June 30, 2018 and 2017, the pension costs recognised under the aforementioned defined contribution pension plans were $7,650, $8,383, $15,640 and $16,355, respectively.

(17) RETAINED EARNINGS

A. Pursuant to the R.O.C. Company Act, the current year's after-tax earnings should be used initially to cover any accumulated deficit; thereafter 10% of the remaining earnings should be set aside as legal reserve until the balance of legal reserve is equal to that of paid-in capital. The legal reserve shall be exclusively used to cover accumulated deficit, to issue new stocks, or to distribute cash to shareholders in proportion to their share ownership. The use of legal reserve for the issuance of stocks or cash dividends to shareholders in proportion to their share ownership is permitted provided that the balance of such reserve exceeds 25% of the Company’s paid-in capital.

B. Since the Company is in a changeable industry environment and the life cycle of the Company is in a stable growth, the appropriation of earnings should consider fund requirements and capital budget to decide how much earnings will be kept or distributed and how much cash dividends will be distributed. According to the Company’s Articles of Incorporation, 10% of the annual net income, after offsetting any loss of prior years and paying all taxes and dues, shall be set aside as legal reserve. The remaining net income and the unappropriated retained earnings from prior years can be distributed in accordance with a resolution passed during a meeting of the Board of Directors and approved at the stockholders' meeting. Of the amount to be distributed by the Company, stockholders’ dividends shall comprise 50% to 100% of the unappropriated retained earnings, and the percentage of cash dividends shall not be less than 30% of dividends distributed.

C. In accordance with the regulations, the Company shall set aside special reserve for the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings. The amounts previously set aside by the Company as special reserve on initial application of IFRSs in accordance with Jin-Guan-Zheng-Fa-Zi Letter No. 1010012865, dated April 6, 2012, shall be reversed proportionately when the relevant assets are used, disposed of or reclassified subsequently.

D. The Company recognised cash dividends and stock dividends distributed to owners amounting to $228,098 ($0.30 in dollars per share) and $304,130 ($0.40 in dollars per share) for the year ended December 31, 2017, respectively. On June 27, 2018, the stockholders resolved for the distribution of cash dividends of $379,555 ($0.48 in dollars per share) for the year 2017.

8. PLEDGED ASSETS

Details of the Group's assets pledged as collateral are as follows:

Assets	June 30, 2018	December 31, 2017	June 30, 2017	Purpose of collateral
Time deposits (Note)	$ 35,510	$ 28,831	$ 28,831	Customs duty and performance guarantee

Note: Listed as "Other financial assets - current" and "Other financial assets - non-current".

9. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNISED CONTRACT COMMITMENTS

(1) As of June 30, 2018, December 31, 2017 and June 30, 2017, the Group's unused letters of credit amounted to $5,470, $4,952 and $－, respectively.

(2) As of June 30, 2018, December 31, 2017 and June 30, 2017, the Group's remaining balance due for construction in progress and prepayments for equipment was $104,179, $132,783 and $148,537, respectively.

(3) The Company entered into a non-cancellable operating lease agreement for the period from June 1, 2011 to February 28, 2018 for the land in Tainan Science Park, and the new lease agreement has been signed in March with a new period from March 1, 2018 to February 28, 2038. The lease period of the lease agreement cannot be over 20 years and is renewable at the end of the lease term. The Company pays monthly rent. If the announced land values, state-owned land rent rate, or other factors change, the monthly rent paid by the Company will be adjusted accordingly on the following month. The Company may have to pay additional rent or get a refund on its last rental payment because of such adjustment. The rent expense of $5,895, $5,569, $11,789 and $11,138 (listed as "operating costs" and "operating expenses") was recognised in profit or loss for the three-month and six-month periods ended June 30, 2018 and 2017, respectively. The future aggregate minimum lease payments under non-cancellable operating leases are as follows:

	June 30, 2018	December 31, 2017	June 30, 2017
Within one year	$ 23,577	$ 23,577	$ 14,851
Later than one year but not exceeding five years	94,308	94,308	-
Later than five years	345,798	357,586	-
	$ 463,683	$ 475,471	$ 14,851

(4) The amounts of endorsements and guarantees for subsidiaries were as follows:

	Nature	June 30, 2018	December 31, 2017	June 30, 2017
SciAnda (Changshu) Pharmaceuticals, Ltd.	Guarantee for financing amount	$ 2,563,452	$ 2,543,275	$ 1,570,145

As of June 30, 2018, December 31, 2017 and June 30, 2017, the actual amount drawn down for endorsements and guarantees to subsidiaries was $1,336,086, $1,317,219 and $1,318,922, respectively.

10. SIGNIFICANT DISASTER LOSS: None.

11. SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE: None.

12. OTHERS

(1) Capital management

The Group's objectives on managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders, to maintain an optimal capital structure, to reduce the cost of capital and to maintain an adequate capital structure to enable the expansion and enhancement of equipment. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return of capital to shareholders, and issue new shares or sell assets to reduce debts.

(2) Financial instruments

A. Financial instruments

For details of the Group's financial instruments by category, please refer to Notes 6 and 12(4) .

B. Risk management policies

(a)The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, price risk and interest rate risk), credit risk and liquidity risk.

(b)The Group's treasury identifies, evaluates and hedges financial risks closely with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as use of derivative financial instruments and investment of excess liquidity.

(c)Information about derivative financial instruments that are used to hedge financial risk are provided in Note 6(2).

C. Significant financial risks and degrees of financial risks

(a) Market risk

I. Foreign exchange rate risk

(i) The Group operates internationally and is exposed to foreign exchange risk arising from the transations of the Company and its subsidiaries used in various functional currency, primarily with respect to USD. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities.

(ii) To manage their foreign exchange risk arising from future commercial transactions and recognised assets and liabilities, entities in the Group are required to hedge their foreign exchange risk exposure using forward foreign exchange contracts. However, the Group does not adopt hedging accounting. Details of financial assets or liabilities at fair value through profit or loss are provided in Note 6(2).

(iii)The Group's businesses involve some non-functional currency operations (the Company's and certain subsidiaries' functional currency: NTD; other subsidiaries' functional currency: CNY). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

	June 30, 2018		
	Foreign currency amount (in thousands)	Exchange rate	Book value (NTD)
(Foreign currency functional currency)			
Financial assets			
Monetary items			
USD:NTD	$ 23,818	30.46	$ 725,496

CNY:NTD	60	4.486	269
Financial liabilities			
Monetary items			
USD:NTD	1,366	30.42	41,554
EUR:NTD	69	34.72	2,396
CNY:NTD	427	4.486	1,916

(iv)As of June 30, 2018 and 2017, if the NTD:USD exchange rate appreciates/depreciates by 5% with all other factors remaining constant, the Group's net profit after tax for the six-month periods ended June 30, 2018 and 2017 would increase/decrease by $17,802 and $32,552, respectively. If the NTD:EUR exchange rate appreciates/depreciates by 5% with all other factors remaining constant, the Group's net profit after tax for the six-month periods ended June 30, 2018 and 2017 would increase/decrease by $168 and $308, respectively. If the NTD:CNY exchange rate appreciates/depreciates by 5% with all other factors remaining constant, the Group's net profit after tax for the six-month periods ended June 30, 2018 and 2017 would increase/decrease by $11 and $68, respectively.

(v)Total exchange gain (loss) including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Group for the three-month and six-month periods ended June 30, 2018 and 2017 amounted to $23,582, $7,106, $5,808 and ($28,010), respectively.

II. Price risk

The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets (listed as "financial assets carried at cost - non-current"). To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio and set stop-loss amounts for these instruments. The Group expects no significant market risk.

III. Cash flow and fair value interest rate risk

(i)The Group's main interest rate risk arises from short-term and long-term borrowings with variable rates and exposes the Group to cash flow interest rate risk. During the six-month periods ended June 30, 2018 and 2017, the Group's borrowings at variable rate were denominated in USD and CNY.

(ii) The Group's borrowings are measured at amortised cost. The borrowings are periodically contractually repriced and to that extent are also exposed to the risk of future changes in market interest rates.

(iii) If the borrowing interest rates had increased/decreased by 10% with all other variables held constant, post-tax profit for the six-month periods ended June 30, 2018 and 2017 would have increased/decreased by $466 and $1,076, respectively. The main factor is that changes in interest expense result from floating-rate borrowings.

(b) Credit risk

Effective 2018

I. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. The main factor is that counterparties could not repay in full the accounts receivable based on the agreed terms.

II. The Group manages their credit risk taking into consideration the entire group's concern. For banks and financial institutions, only independently rated parties with a minimum rating of 'A' are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored.

III. The Group adopts the following assumption under IFRS 9: If the contract payments were past due over 30 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition.

IV. The Group manages its credit risk, whereby if the contract payments are past due over 180 days based on the terms, there has been impairment.

V. The Group classifies customers' accounts receivable in accordance with credit rating of customer and credit risk on trade. The Group applies the simplified approach using provision matrix to estimate expected credit loss, and use the forecastability to adjust historical and timely information to assess the default possibility of accounts receivable. Movements in relation to the group applying the simplified approach to provide loss allowance for accounts receivable are as follows:

	For the six-month period ended June 30, 2018
At January 1	$ 130
Impairment loss	141
At June 30	$ 271

VI. Credit risk information for 2017 is provided in Note 12(4).

(c) Liquidity risk

I. Cash flow forecasting is performed by the Group's treasury department which monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities.

II. The Group has undrawn borrowing facilities amounting to $5,022,182, $2,974,463 and $4,957,234 as of June 30, 2018, December 31, 2017 and June 30, 2017, respectively.

III. The following table comprises the Group's non-derivative financial liabilities and derivative financial liabilities with gross-amount settlement that are grouped by their maturity. Non-derivative financial liabilities are analyzed from the balance sheet date to the contract maturity date, and derivative financial liabilities are analyzed from the balance sheet date to the expected maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. Amarket is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in foreign exchange contracts is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in equity investment without active market is included in Level 3

B. Financial instruments not measured at fair value

The carrying amounts of cash and cash equivalents, financial assets at amortised cost - current, accounts receivable, other receivables, guarantee deposits paid, other financial assets - non-current, short-term borrowings, notes payable, accounts payable, other payable, long-term borrowings (including current portion) and guarantee deposits received are approximate to their fair values.

C. The related information of financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities are as follows:

June 30, 2018	Level 1	Level 2	Level 3	Total
Assets:				
Recurring fair value measurements				
Financial assets at fair value through other comprehensive income				
Equity securities	$ 279,001	$ -	$ 326,852	$ 605,853
Liabilities:				
Recurring fair value measurements				
Financial assets at fair value through profit or loss				
Derivative instruments	$ -	$ 4,936	$ -	$ 4,936

June 30, 2017	Level 1	Level 2	Level 3	Total
Liabilities:				
Recurring fair value measurements				
Financial assets at fair value through profit or loss				
Derivative instruments	$ -	$ 2,457	$ -	$ 2,457

December 31, 2017: None.

D. The methods and assumptions the Group used to measure fair value are as follows:

(a) The instruments the Group used market quoted prices as its fair values (that is, Level 1) is listed below by characteristics:

	Listed shares
Market quoted price	Closing price

(b) Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.

(c) When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

(d) Forward foreign exchange contracts are usually valued based on the current forward exchange rate.

E. Foresee Pharmaceuticals Co., Ltd. has been listed on the Taipei Exchange from June, 2018, therefore, the Group transferred the fair value from Level 2 to Level 1 at the end of the month when the event occurred. For the six-month period ended June 30, 2017, there was no transfer between Level 1 and Level 2.

F. The following chart is the movement of Level 3 for the six-month periods ended June 30, 2018 and 2017:

	For the six-month periods ended June 30,	
	2018	2017
	Equity instrument	Equity instrument
At January 1	$ -	$ -
Effect on retrospective application and restatement	242,355	-
Balance after restatement on January 1	242,355	-
Gain recognised in other comprehensive income	84,497	-
At June 30	$ 326,852	$ -

G. The Group's valuation procedures for fair value measurements is categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently assess to make any other necessary adjustments to the fair value.

H. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at June 30, 2018	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:					
Unlisted shares	$ 326,852	Net asset value	Not applicable	—	The higher the net asset value, the higher the fair value

I. The Group has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. If the net assets value increased or decreased by 1% for Level 3, however, other comprehensive income for the six-month period ended June 30, 2018 is immaterial.

(4) <u>Effects on initial application of IFRS 9 and information on application of IAS 39 in 2017</u>

A. Summary of significant accounting policies adopted in the second quarter of 2017:

(a) Financial assets at fair value through profit or loss

i. They are financial assets held for trading or financial assets designated as at fair value through profit or loss on initial recognition. Financial assets are classified in this category of held for trading if acquired principally for the purpose of selling in the short-term. Derivatives are also categorised as financial assets held for trading unless they are designated as hedges. Financial assets that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:

(i) Hybrid (combined) contracts; or

(ii) They eliminate or significantly reduce a measurement or recognition inconsistency; or

(iii) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.

ii. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.

iii. Financial liabilities at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed in profit or loss. These financial liabilities are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial liabilities are recognised in profit or loss.

(b) Receivables

Accounts receivable are receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. They are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. However, short-term accounts receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(c) Available for sale financial assets

i. They are non-derivatives that are either designated in this category or not classified in any of the other categories.

ii. On a regular way purchase or sale basis, available-for-sale financial assets are recognised and derecognised using trade date accounting.

iii. They are initially recognised at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in other comprehensive income. Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in ‘financial assets carried at cost’.

(d) Impairment of financial assets

i. The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

ii. The criteria that the Group uses to determine whether there is objective evidence of an impairment loss is as follows:

(i) Significant financial difficulty of the issuer or debtor;

(ii) The disappearance of an active market for that financial asset because of financial difficulties;

(iii) Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;

(iv) Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered;

(v) A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

iii. When the Group assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:

(i) Financial assets carried at cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at current market return rate of similar financial asset, and is recognised in profit or loss. Impairment loss recognised for this category shall not be reversed subsequently. Impairment loss is recognised by adjusting the carrying amount of the asset through the use of an impairment allowance account.

(ii) Financial assets at amortised cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortised cost that would have been at the date of reversal had the impairment loss not been recognised previously. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset through the use of an impairment allowance account.

B. The reconciliations of carrying amount of financial assets transferred from December 31, 2017, IAS 39, to January 1, 2018, IFRS 9, were as follows:

Under IFRS 9, financial assets carried at cost amounting to $391,097 were not held for the purpose of trading, and the Group has made an irrevocable election to reclassify as “Financial assets at fair value though other comprehensive income” amounting to $539,572, and increased other equity interest in the amount of $148,475.

C. The significant accounts as of December 31, 2017 and June 30, 2017 are as follows:

(a) Financial liabilities at fair value through profit or loss

Items	December 31, 2017	June 30, 2017
Current items:		
Financial assets held for trading		
Non-hedging derivatives	$ -	$ 2,457

i. The Group recognised net (loss) gain of ($2,859) and $9,238 on financial liabilities held for trading (listed as “Other gains and losses”) for the three-month and six-month periods ended June 30, 2017.

ii. The non-hedging derivative instruments transaction and contract information are as follows (Unit in thousand of currencies indicated):

	June 30, 2017	
Item	Contract amount	Contract period
Forward foreign exchange contracts	USD 10,510	5.2017~8.2017

The Group entered into forward foreign contracts to hedge exchange rate risk of operating activities. However, these forward foreign exchange contracts are not accounted for under hedge accounting.

iii. As of December 31, 2017 and June 30, 2017, no financial assets at fair value through profit or loss held by the Group were pledged to others.

(b) Financial assets carried at cost - non-current

	December 31, 2017	June 30, 2017
Unlisted shares		
Tanvex Biologics, Inc.	$ 167,673	$ 167,673
SYNGEN INC.	4,620	4,620
Foresee Pharmaceuticals Co., Ltd.	223,424	223,424
	395,717	395,717
Less: Accumulated impairment	(4,620)	(4,620)
	$ 391,097	$ 391,097

i. The Group classified some of its equity investments as available-for-sale financial assets, based on its intention. However, as these stocks are not traded in an active market, and there is no sufficient information of similar companies in the industry, fair value of the investments cannot be measured reliably. Accordingly, the Group classified those stocks as "financial assets carried at cost".

ii. As of December 31, 2017 and June 30, 2017, no financial assets carried at cost held by the Group were pledged to others.

D. Credit risk information as of December 31, 2017 and June 30, 2017 and second quarter of 2017 are as follows:

(a) As of December 31, 2017 and June 30, 2017, the Group had no accounts receivable classified as "past due but not impaired".

(b) Movements on the provision for impairment of accounts receivable are as follows:

	For the six-month period ended June 30, 2017
	Group provision
At January 1	$ 647
Reversal for impairment (Note)	(563)
Effects of exchange rate	(1)
At June 30	$ 83

Note: Listed as "Other income".

(c) The Group's accounts receivable that were neither past due nor impaired were fully performing in line with the credit standards prescribed based on counterparties' industrial characteristics, business scale and profitability.

(d) Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments on the contract obligations. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored. Credit risk arises from cash and cash equivalents outstanding receivables. The Group also transacts with many different banks and financial institutions to diversity risk.

(e) For the six-month period ended June 30, 2017, no credit limits were exceeded during the reporting periods.

(5) Effects of initial application of IFRS 15 and information on application of IAS 11 and IAS 18 in 2017

A. The significant accounting policies applied on revenue recognition for the second quarter of 2017 are set out below.

(a) Sales of goods

The Group manufactures and sells API and intermediates, etc. Revenue is measured at the fair value of the consideration received or receivable taking into account value-added tax, returns, rebates and discounts for the sale of goods to external customers in the ordinary course of the Group's activities. Revenue arising from the sales of goods is recognised when the Group has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards of ownership have been transferred to the customer, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

(b) Sales of services

The Group provides technology development and research and development consulting. Revenue from rendering services is recognised under the percentage-of-completion method when the outcome of services provided can be estimated reliably. The stage of completion of a service contract is measured by the percentage of the actual services performed as of the financial reporting date to the total services to be performed by surveys of work performed.

B. The revenue recognised by using above accounting policies for the second quarter of 2017 are as follows:

		For the three-month period ended June 30, 2017
Sales revenue	$	892,121
Less: Sales returns	(	144,302)
Net sales revenue		747,819
Technical services		33,383
Royalties		71,953
	$	853,155

		For the six-month period ended June 30, 2017
Sales revenue	$	1,757,265
Less: Sales returns	(	186,772)
Net sales revenue		1,570,493
Technical services		71,961
Royalties		130,188
	$	1,772,642

C. If the Group continues adopting above accounting policies for the second quarter of 2018, the effect and description of current balance sheets are as follows and statements of comprehensive income is immaterial.

Under IFRS 15, liabilities in relation to customer contracts are recognised as contract liabilities, but were previously presented as advance sales receipts in the balance sheet. As of June 30, 2018, the balance amounted to $27,408.
